

## 10 Places to Promote Your Ebook

If you've got an ebook to promote -- whether it's free or not - one of the first priorities is to get it listed on all the main ebook websites on the internet.

This is important for two reasons...

Firstly, you'll enjoy the direct benefit of incoming visitors from these websites. And, these are not just any old visitors -- these are people who are actively interested in ebooks and who are especially interested in your ebook. In other words, this is highly targeted traffic.

Secondly, there's the advantage of getting good quality links pointing to your ebook page. These incoming links are an important part of building your credibility in the 'eyes' of major search engines like Yahoo! and Google. They'll help you achieve higher placement in search engine results. In short, even more targeted traffic.

So, don't put it off. Visit each of the sites listed below, complete the short submission form and start enjoying the benefits right away.
