

MillionDollarHosting.net releases Web Hosting Control Panel v1.2

[MillionDollarHosting.net, a provider of cheap web hosting solutions](#), announces the launch of the latest version of their well-known hosting Control Panel. The new Control Panel v1.2 now features the following major improvements: modified titles and descriptions of the main sections; quick domain registration and transfer; detailed context help in each and every main section of the Control Panel; advanced load stats with additional resource reports allowing you to examine the exact running processes.

The entire Domain Registration section of the hosting Control Panel has been updated to accommodate the new bulk domain registrations and transfers. From now on, you will be able to register up to 50 domain names at once. For every single domain name search query you put, you will get a result showing you whether the particular domain is available for registration or transfer. If you'd like to register or transfer the .com, .org, .net, .us, .info, .biz SLD of a domain name, simply take advantage of the multiple domain registrations and transfers we are now offering!

Million Dollar Hosting team also announces that their innovative web hosting control panel is now translated and available in Dutch. Starting today, the our clients in the Netherlands will be able to use the web hosting control panel in their native language. The addition of a new language to the web hosting control panel is a result of our commitment to better serve our ever increasing web hosting customer base. You can change the language of the web hosting control panel through the drop-down menu at the top right of the control panel as well as through the Customize Control Panel icon at the bottom of the home page of the web hosting control panel. Besides Dutch, the customers can choose to manage their hosting accounts in English, German, Spanish, French, Portuguese, Norwegian, Russian, Ukrainian and Bulgarian.

The MillionDollarHosting.net's web hosting control panel supports also automated installation of over 30 popular PHP scripts, among them phpAdsNew, phpList, Geeklog, PhpWiki, phpWebSite, phpBB2, OS Commerce, Mambo, PHP Nuke, PostNuke, phplinks and many others, grouped in the following categories: Ad Management, Blog, Calendars, Classified Ads, Content Management, Customer Support, Discussion Boards, E-commerce, File Manipulation, Groupware Tools, Image Galleries, Portal Systems, Server Management and Web Hosting Tools.

Million Dollar Hosting provides Linux/PHP/MySQL hosting plans with bunch of disk space and data transfer, which are especially important for image, audio and flash hosting. Their ['Business' Plan](#) starts from only 3.99\$ for 15,000 MB of storage and 300 GB of traffic. Low cost web hosting plans are accompanied by cheap domain registration and 24/7 phone support.
