

## Graphic Downloads – Is This Something That You Want To Use?

There are a lot of websites online that use graphics to help them look professional. Some of them even have graphic downloads that they can use or you can use. However, you have to be very careful about what type of graphics you use online. Why is it important to be careful?

One: Graphic downloads may include graphics that are copyrighted by someone else. You can be sued for using a copyrighted graphic. You don't want to copy a design from anyone else's website unless you have their written permission.

Two: Graphics are all over the place but when you don't know where the graphics were collected from or made from you could end up getting yourself into trouble. Unless you know for a fact that the person you are getting them from would not give you anything that was copyrighted.

The graphics that you use on your website can help it to look professional or like an amateur site. You always want your site to look professional because when it doesn't you will end up losing money. No one wants to buy anything from someone that doesn't look and sound professional.

There are a couple of different ways that you can get graphic downloads without getting into trouble.

One: You can find someone to make your graphics for you. This can get expensive though so you want to make sure you do your research before using this option.

Two: Find a graphics package from someone that knows about graphics and won't sell you anything copyrighted.

Three: The best way to get the graphics that you need is to find a graphics library that is a membership site. Membership sites won't give you any graphics that are copyrighted because they can get into big trouble if they do.

Four: If you are a graphic designer you can make them yourself.

These are all the ways that you can get the graphic downloads that you need but some are better than others. You just want to make sure that you check into all of your options before you decide how to get the graphics for your site. It is very important that you know where everything is coming from before you use it online. You want to make money from your website, not lose money from bad graphics or get sued for using copyrighted material. It is always better to be safe and smart by doing your homework before you use anything.
