Requirements for legitimacy:

1- They must have proof of earnings from their online typing job. At least, a picture of a paycheck or maybe a picture of their account earnings. (Some have daily sub-totals)

2- They must have a way of contacting them. (Telephone, e-mail, fax, etc.) Write down their contact information in case of any issue in the future.

3- They should have a section where they tell you a little about their company. The purpose and role of the company is more than enough.

4-They should always have a "Frequently Asked Questions" page (FAQ) - This is very important and a must-read section. You should find what other people typically ask and what the company has answered. These questions are often the most important ones.

These are the principal requirements of every home or online typing job. If you find any that don't meet these, don't bother.

A reasonable amount of money you can make from home online jobs, like typing jobs can range from \$150-\$300+ a day and up (depending on the company) And depending on your efforts it may get close to this amount more or less.
